

# **FUN, FACTS AND FITNESS**

**Week 1 May 31-3 (Closed May 30 for Family Holiday)** "All Heart" The average adult heart beats about 72 times a minute, 100,000 times a day and around 35 MILLION times a year. Children will "see, feel, and hear" all about the heart this week.

**Week 2 June 6-10** "Them Bones" Did you know you lose bones over time? Ever thought about which bones are longest and which ones are the shortest or wonder how do bones heal? This week children will study amazing facts about bones and tips on keeping bones healthy.

**Week 3 June 13-17** "Brain Power" Brain development shows a child's increasing ability to understand his or her environment. As children grow and develop, they will learn many new things and begin to solve problems in their daily life. Simple, everyday activities in preschool contribute to young kids' brain growth at a critical period in their development. Practical Life activities are this week's focus.

**Week 4 June 20 - 24** "Science Experiments" Preschoolers ask a lot of questions about the world. This week Ms. Sheila will guide children to be curious, make discoveries, and think scientifically.

**Week 5 June 27 to July 1** "Take a Breath" The lungs are the only organs that can float on water and the common cold can be caused by hundreds of different viruses. Olfactory is the sense of smell. It is essential for young children to be able to differentiate between taste and smell. We will learn about our nose and experience different smells in the indoor and outdoor environment.

**Week 6 July 5-8 Child Care Only/Closed July 4 for Family Holiday**

**Week 7 July 11-15** "Emotion Commotion" Emotions flow through our body all the time, regulating everything, including our thoughts. Activities this week include art, songs, discussion and stories together, to help kids experience their emotions in practical ways.

**Week 8 July 18-22** "The Skin I'm In" We will learn about the important job that skin has and how to take care of it. Skin is the body's largest organ and is thickest on your feet and thinnest on your eyelids. Students will be invited to celebrate their skin tones and learn about the biological basis of skin color.

**Week 9 July 25-29** "Hand in Hand" This week we will use our hands to clap, make crafts, dance, and play sports. We will learn left and right and play instruments and practice washing our hands.

**Week 10 August 1-5** "Food Fun" Our last week of camp we will learn about digestion. Activities include cooking and planting herbs.
